

Subject Line: Who's Really Walking Who?

Hi Lisa,

Tony Philips here from JoyRide Harness and I have a question for you... do you remember the movie Halloween? What a horror classic. Michael Meyers stalks Jaimie Lee Curtis through one night of terror.

Well this reminds me of a story a friend of mine was telling me the other day.

You see, she has this dog, Oliver – he's one of those adorable combinations of Sheepdog and Poodles – A Sheepadoodle.

Very cute, very energetic and very **STRONG**.

Thing is my friend is only 5 foot two, 120 lbs. Her neighbors routinely joke around with her when they pass by during Oliver's walk. They say "hey miss...who's walking who here?"

But here's the scary part...

Oliver pulls so hard on his collar that it literally chokes him. And the sound he makes when this happens is much like the sound Michael Myers makes in the Halloween movies when the killer stalks his victims--a heavy breathing-through-the-mask sound. And it's **FRIGHTENING**.

In fact, he scared the bejeesus out of this older couple out for their evening walk.

But as cute as this may be...a hard to control dog, out on his walk...is no laughing matter

A dog that pulls you down the road on his daily walk or who pulls in every which way when stimulated by another dog or person is a disaster waiting to happen.

Not to mention, this behavior takes all of the enjoyment out of the walk for you - - turning the walk into an unwanted exercise session of tug of war at best and at worst, an injury for you if you fall down.

And let's not even think about what could happen if your dog gets off their leash...

Many dog owners have tried to use special training collars to no avail and some have even used "no pull" harnesses only to see their dog pull even more.

Why? Because the typical harness out on the market actually encourages the dog to pull.

But not this one

(CLICK LINK HERE)

The Original All-in-One™ No Pull Dog Harness by Joyride has the answer to stop your dog's pulling behavior and you will notice the difference on your very first walk.

The secret is in the unique placement of the training rings. Simply attach the leash to one of the side rings and when your dog begins to pull, instead of building up pulling tension, they will get spun around and won't be able to pull.

And let me tell you, there is nothing like a few spin arounds in a circle to get your dog to realize that pulling doesn't get them where they'd like to go.

Amazing right?
